## SIBERIAN IRIS

Siberian Iris, with its grasslike foliage, should be planted freely around water. The Siberian Iris will thrive in moist locations which are too damp for most other plants; they will bloom profusely with practically no attention and are so hardy that one need only to plant them and set by and enjoy the exquisite blooms.

# Reduced Fall Prices on Nursery Material for Foundation Planting

## EVERGREENS

Plantmen have known for many years the advantage of Fall planting, but comparatively few home owners have availed themselves of this most favorable season. Evergreens are in most cases, planted more satisfactorily in August, September, and October than at any other season of the year. Cool nights, heavy dews and an abundance of rainfall in the Fall, together with the fact that most root growth is made at this time, makes this the ideal time for you to plant. Deciduous shrubs and trees are best planted after first frost; that is usually October, November, and December.

As an added inducement to Fall planting we offer annually in the Fall greatly reduced prices.

EVERGREEN FOUNDATION PLANTING

## HEMLOCK Our Specialty

We are proud of the quality of our stock of Hemlock. All have been sheared and transplanted frequently and we can supply Hemlock in almost any size and quantity from 2 to 30 feet in height.

# PHLOX

Following the Irises and Peonies in time of bloom, but in no way behind them in popularity, are the Hardy Perennial Phloxes. We have weeded out all the magentas and purples, and believe that our list is as select as that offered by any firm.

Phloxes are shallow-rooted plants and should, therefore, be planted a little deeper than most plants and kept well tilled to conserve the moisture, as they cannot stand dry, packed soil like Peonies and Irises. No fertilizer should be near the roots. A little bonemeal sprinkled on the surface of the ground before hoeing gives good results, but be careful not to use too much.

## ALL PHLOX 2-YEAR-OLD, FIELD-GROWN, BLOOMING SIZE

**Attraction.** Brilliant scarlet orange with carmine eye; unusually large flowers. 30c. each, 3 for 85c., 12 for \$3.25.

**Saladin.** Brilliant orange scarlet flowers in large trusses. Does not scald or sunburn like many of this coloring. 25c. each, 3 for 60c., 12 for \$2.25.

**Salmon Glow (New).** Lively flame pink, with salmon shades, softened with lilac and white tints at center, the effect being rich salmon. 35c. each, 3 for 95c., 12 for \$3.25.

**Smiles.** Lilac pink with darker eye. Extra large flower heads. Very fine. 30c. each, 3 for 85c., 12 for \$3.25.

**Somerkleid.** White with red eye, very distinctive. 30c. each, 3 for 85c., 12 for \$3.25.

## EARLY TO BEAR FRUIT

Fruit trees continue very scarce throughout the country, especially in larger sizes, but anticipating this shortage we are able to offer this Fall a considerable quantity of 3- to 6-year-old trees in both dwarfs and standards.

**STANDARD PEARS.** 3-year, 4-year, and 5-year, in **Bartlett, Clapps' Favorite, Seckle, and Sheldon.**

**CRABAPPLES.** 4- and 5-year-old **Hyslop** and **Transcendant.**

**Note**—Apples and Pears are best planted in **Fall**, while Cherries, Plums and Peaches are best planted in **Spring**.
